

# Readibots

Rapid. Repeatable. READI™

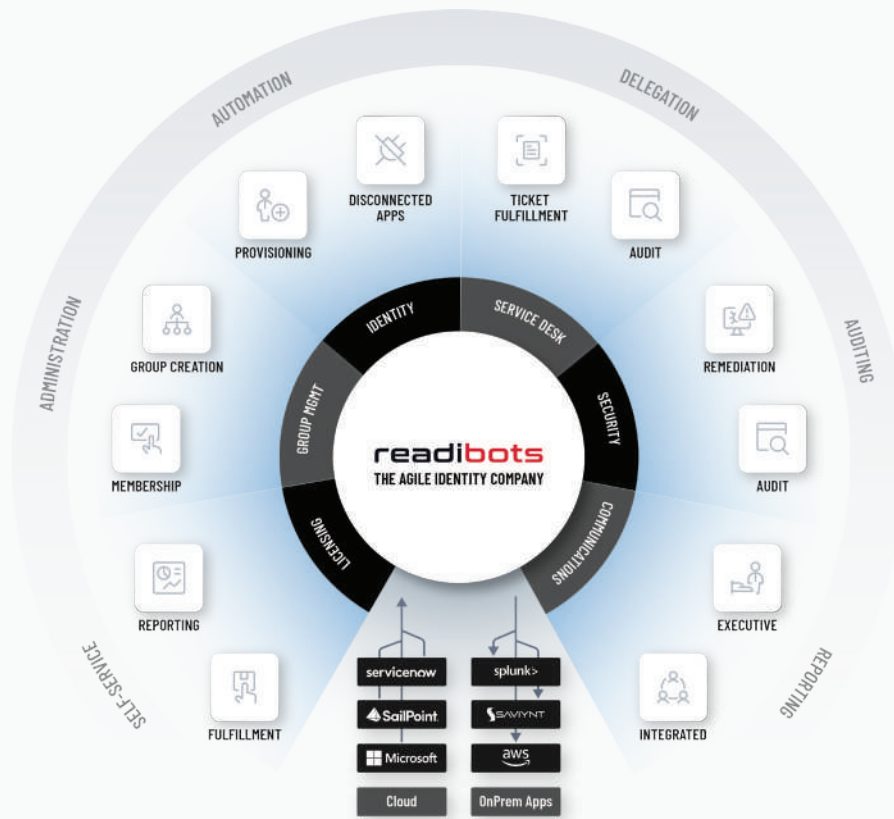

The Agile Identity Platform that Delivers Immediate Results.

## Automate everything rapidly and iteratively with Readibots.

Accelerate Identity Management projects by integrating your current IGA to automate complex business processes and edge cases reducing Identity Governance implementation costs. Readibots governed identity driven automation is key to responding to both critical activities and alerts immediately; and automates the general requests currently bombarding your teams. Readibots provides a bridge between Identity, Security and Operations integrating Identity into other IT processes.

The Identity Team manages a user's identity throughout its lifecycle, the Security Team provides requirements to keep the company secure and the Operational team implements the automation according to existing processes. The Readibots solution provides complete automation for each of these teams automating business processes which improve SLA's from days to seconds, close threat windows, and reduces the mean time to resolution (MTTR). Readibots is centralized, reusable and governed.

### Readibots Allows You to Automate and Visualize Any Process for Any Platform

## Identity Administration

Identity-Driven automation to connect platforms for a seamless solution. Automate existing processes and extend the life of your IGA platform. Empower your organization to administer systems using a virtualized organization and delegated RBAC administration.

## Group Management

Manage groups and membership across all environments. Dynamically create, manage, and synchronize groups with governed customizable policies rather than static assignments.

## Service Desk

Empower your serviced desk with immediate resolution as tickets are received reducing existing workloads and the need for escalations. Readibots playbooks are consistent, repeatable, and governed so you can visualize the process and respond faster.

## Security

Readibots brings true automated remediation to your SOC with highly productive, rapid responsive playbooks created and maintained by experts who understand the process and have the access to resolve any issue.

## Multi-Tenant

Manage Multiple Tenants as One. Experience a single-pane-of-glass view of your entire enterprise across all tenants to understand usage, licensing, security, and compliance profiles.

## Communication

Communicate information to the correct people with the urgency required through the channels which are most effective for your teams. Readibots integrates with your communication technologies and provides a powerful extension to your messaging capabilities.

## Bot Studio

Automate Manual Processes by integrating and extending existing solutions by automating challenging processes easily.

## The READI Platform

The READI Platform provides the identity data fabric needed to assemble processes and applications that meet 100% of their requirements with a single architecture.

## About Readibots

Readibots is an industry leader in Agile Identity. Readibots changes the game from a traditional waterfall approach by building identity on an automation platform. Readibots allows organizations to focus on specific pain points with a start anywhere and go anywhere agile approach. Readibots has the tools to transform manual processes into efficient and secure automations. An enterprise-integrated solution delivered incrementally for maximum value.
