

MIM 2016 Migration Headache Solved

Simplifying the Journey to Strategic Success

The Problem We Solve

The Microsoft Product group has made it clear there will not be any extension for [MIM 2016 End of Life](#). Extended support ends Jan 9, 2029 which means no more support, security patches, or updates. Microsoft's proposed replacement is Entra Identity Governance (IGA) which does not have feature parity with MIM's extended features.

Our streamlined approach frees your internal resources to focus on what matters most: solving real business challenges. We align with your vision and deliver measurable outcomes. No more getting bogged down in tool evaluations or learning yet another platform. We bring tailored, flexible solutions directly to you—accelerating results and simplifying every step of the journey.

Our Solution

One of MIM's key strengths was the ability to write complex custom REST/API/SOAP, .NET, and PowerShell code to accomplish workflows developed over years. This now leaves customers with legacy technical debts moving to a different platform with significant costs to recreate these workflows and business logic. Entra IGA uses Logic Apps which is a reinvestment and retraining of all those workflows and resources.

Many customers have struggled with a migration path over the past few years and have not done anything yet, but the clock is ticking quickly now! Other IGA solutions typically take 6 to 12 months to get started reevaluating the business processes and conducting proof of concept for feasibility.

READI is a flexible platform that is directory and vendor neutral, it enables customers to quickly and easily transition their existing REST/API/SOAP, .NET, and PowerShell code within weeks without changing your critical business processes. It is a SaaS solution which means no more server patching or downtime and a central repository for ALL your scripts to reside with version control, RBAC, and auditing.

READI for Seamless MIM Transition

READI preserves your critical workflows, replacing MIM with a modern, flexible SaaS platform—fast, secure, future-ready.

Highlights

Rapid Migration.

Port existing REST/API/SOAP, .NET, and PowerShell code in weeks, not months.

Continuity Without Rebuilds.

Preserve business logic, avoid costly reinvention in Logic Apps.

Unified Identity.

Central repository, version control, RBAC, and full auditing for compliance.

Seamless Integrations.

Connect HR, directories, SaaS, and databases with prebuilt or custom connectors.

Agile Outcomes.

Accelerated results through short, focused iterations aligned to business goals.

The READI Platform Provides:

Bot Studio

for your custom REST/API/SOAP, .NET, and PowerShell code that can be quickly ported and reused including version control and auditing.

Dynamic Group Management

enables customers to leverage READI's Unified Directory to create and manage dynamic groups and replicate them to all your data stores and applications.

Connector Studio

for connections to your HR, on-prem, cloud directories, SaaS, and databases. Synchronize objects across systems, and even build custom connectors for your in-house applications. Flexible, enterprise-ready integration made simple.

Self Service Portal

to replace one of the key strengths MIM had for end users and decreasing Help Desk tickets.

Multi-tenant/directory

administration in a single portal with RBAC roles only presenting the objects and attributes the user has access to, implementing a comprehensive Least Privilege compliance model.

Central Auditing

down to the attribute for all changes across the READI Platform.

Unified Directory

to amalgamate and consolidate your identity metadata into a single place with an easy customizable schema.

One Partner, Real Results.

Success starts with the right team and a proven methodology. At READI, you're not just investing in a product and a team to "make it work." You're partnering with experts dedicated to delivering meaningful outcomes.

Our READI Platform ensures every step is intentional, focused, and aligned with your goals. When you engage with READI, you gain more than just another a service—you gain a team committed to turning your vision into reality.

Assembling the Team and Preparing for Success

- Clear, outcome-driven plans aligning business, compliance, and technical goals.
- Agile Identity tackles evolving challenges with speed and precision.
- Short iterations deliver results in weeks, not months.
- Customer care with consistency, accountability, and respect.

About READI

At READI, we're revolutionizing the way businesses approach IT automation and security. Our SaaS platform uses innovative, cutting-edge technology to streamline processes and improve efficiency for all types of organizations. From pre-built workflows that connect to primary systems to custom workflows that can handle specialized tasks, READI has the platform to transform manual processes into efficient and secure automations. We're not just changing the game; we're defining the future of IT automation and security.
